About Me:

I bring to the table 7 years of commercial experience as a full-stack developer, building applications in PHP/Laravel, Python/Django, Ruby-On-Rails using databases such as MySQL, pgSQL and MongoDB and integrating with various frontend JavaScript frameworks such as VUE and ReactJS.

As well as my software development skills I also have experience in DevOps which includes automating processes, application and system upgrades as well as ensuring security and pen-testing. In addition to working with custom inhouse hosting setups based on VM's I also have experience with AWS, DigitalOcean, Azure, and VPS's.

A well as been able to learn quickly and work independently. I am also a team player, and believe in knowledge sharing and helping my co-workers

Skills

Technologies
- Git, Ruby and RoR, Linux, Shell scripting, Python, MySQL, Laravel/PHP, JavaScript, HTML5, CSS3.

Servers
- Nginx, Apache, Puma, Unicorn, CentOS, Ubuntu

Cloud
- AWS, Digital Ocean, VPS, S3 Bucket, DigitalOcean Block

Methodology
- Rapid development

Source Control
- GitHub, BitBucket, Travis CI
- Git hooks, and customization

<u>Experience</u>

August 2016 – April 2017
Build Environment SME/*UST Global*

- Handling issues related to Linux based OS. Patching, provisioning servers,

English, Hindi, Russian, German

Portfolio

http://hitkarini.com - Developed websites in PHP and Laravel. Also revived the existing timesheet system, upgrading features of a legacy system and integrating new components.
https://github.com/SelfiewiseSocial - The website built with laravel, a social network.
https://github.com/thedesignable/CodeKrieg - The codekrieg's official website, built with Ruby on Rails and addition components.
[https://github.com/thedesignable /thedesignable.github.io](https://github.com/thedesignable/thedesignable.github.io) - A github single page blog built with Jekyll
http://github.com/thedesignable/DCMA-project - DCMA complaint copyright project built on Laravel 5
http://github.com/thedesignable/JSTodo - JSTodo built with javascript components and HTML5 with CSS3
http://github.com/thedesignable/azeruspub - The blog based CMS software built with RubyOnRails

A Little More About Me

I am passionate about learning new technologies and skills. I am also an hobbyist photographer. I am a volunteer at local pet care hospital. I teach underprivileged kids on how to code, even if it is just building one page websites. I am an active discord community member for python and Django. I love helping people who would seek any sort of help in web development or anything related to tech.
